Education

National Institute of Design, Bengaluru | Interaction Design - Class of 2023

School of Planning and Architecture | B. Architecture - Class of 2021

Work Experience (Total: 3 years + in Product designing)

FarEye / Product Designer 2 (5 Prod) - April '25 - Present, Bengaluru - Noida

FarEye is a global leader in last-mile and supply chain management solutions, empowering enterprises to gain real-time visibility, optimise logistics operations, and deliver superior customer experiences across web and mobile platforms.
In my role as PD II at FarEye, I lead design modules for **End Delivery App, Grow (Merchant portals), Rate (Rate card and configuration), and Ship (Shipment executions and invoice reconciliation platforms).**

- Led UX redesign of the **AI Driver Mobile App**, covering **80%+ rider operational workflows,** including compliance checks, Proof of Delivery (POD), AR scanning, and delivery verification for enterprise deployments, including Maersk.
- Designed **Rate AI configuration workflows**, simplifying complex pricing logic and reducing **manual rate setup effort by ~30–40%** for logistics operations teams.
- Redesigned **Rate Card Setup & Module** and **Rate Calculation Rule Logic systems**, enabling flexible pricing across shipments, routes, stops, and delivery attributes for enterprise clients.
- Improved **Carrier Allocation workflows**, simplifying multi-step configuration used by logistics teams to assign carriers across delivery networks, including JB Hi-Fi.
- Led redesign of **CX delivery tracking platforms across web and mobile**, improving delivery visibility, tracking timelines, and customer interaction flows for clients, including Otrium and Ann Summers, etc.
- Conducted **CX usability walkthroughs with the JB Hi-Fi customer team**, validating tracking experience and receiving positive feedback on delivery visibility and interaction flows.
- Designed **Billing Zone and financial workflows**, including **invoice reconciliation** and invoice generation systems for logistics partners such as DKSH, Hawk Logistics, and Inter-Europa, etc.
- Built a **cross-product design system with 20+ reusable components**, reducing UI duplication by **~60–70%** and improving implementation consistency across Ship, Rate, and Grow modules.

Locus.sh / Product Designer 1 (2 Prod) - Aug '23 - April '25 - Bengaluru

As the **lead designer for the LOTR application** (16K users, with approx. 24K tasks/day), I have been responsible for shaping the user experience of a product that supports diverse use cases for a global client base across various regions and business types.

- Led UX improvements for the **LOTR rider mobile platform**, supporting logistics operations managing **16K+ riders and 24K+ delivery tours daily** across global deployments.
- Redesigned **tour cards into configurable workflow modules**, reducing rider task completion time by **~15–20%** and improving operational clarity for delivery workflows.
- Introduced **dynamic IF–THEN operational checklists**, improving compliance completion rates and reducing manual verification for operations teams.
- Designed **payment gateway integration flows**, identifying and resolving **10+ transaction failure scenarios** through improved UX and error handling.
- Implemented **OTP-based login for gig workers**, integrating with **three authentication systems (SSO, QR login, Rider ID)** without disrupting existing users.
- Designed a **multi-level SKU hierarchy system**, enabling logistics teams to track weight, volume, quantity, and batch attributes for partial doorstep deliveries.
- Conducted **field research and usability validation with riders and warehouse managers**, identifying workflow inefficiencies and improving delivery task flows.

Parent of Solutions / UI/UX Designer - Aug '22-Nov '22 - Bengaluru

Contributed to the development of innovative product application platforms at ParentOf in collaboration with product managers.

Seva Sindhu, Govt. of Karnataka / UX Research Internship - Feb '22 - Mar '22, Bengaluru

- Engaged in discussions **with 5+ Seva Sindhu authorities, 10+ Seva Sindhu kiosk operators, and 15+ sample users and received final reviews** to improve the user experience of the Seva Sindhu website.
- This project gave an overall idea of design research processes such as **primary interviews, observational study, card sorting methods, heuristic evaluation, cognitive task analysis, etc.**

Studio Chintala/UX Designer - November 2021-January 2022, Bengaluru

Developed experience in collaborating with clients to accomplish their desired scope.

Skills

Product Design, Critical Thinking, Design System, UX Research, Figma, Experience Mapping, Vibe Coding
